REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach a drill sharpener having at least one port, the port further comprising a generally cylindrical wall of the housing and a guide that maintains a longitudinal length of the bit along a predetermined axial line and at a predetermined angular orientation with respect to the line as the material is removed by the grinding wheel assembly, the guide comprising a resilient portion of the generally cylindrical wall and a flange protruding radially inwardly from the resilient portion of the wall. The closest prior art, to Bernard, teaches a port having a cylindrical wall, the wall comprising a resilient material, and an flange, but the resilient material and flange do not act as a guide feature to maintain the bit at a predetermined angular orientation, but are the equivalent structure to stops 42, shown in applicant's figure 7. The resilient material and flange allow the bit and chuck to be rotated relative to the line, changing the angular orientation of the bit relative to the line.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M Rachuba whose telephone number is 571-272-4493. The examiner can normally be reached on Monday-Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
